

FEMA FLOOD ZONES JUNO BEACH, FLORIDA

FEMA FLOOD ZONE DESIGNATIONS & EXPLANATIONS

A
Subject to 100-year flood. Base flood elevation undetermined.

A5 or A1-A30
Both AE and A1-A30 represent areas subject to 100-year flood with base flood elevation determined.

AH
Subject to 100-year shallow flooding (usually areas of ponding) with average depth of 1-3 feet. Base flood elevation determined.

AO
Subject to 100-year shallow flooding (usually sheet flow on sloping terrain) with average depth of 1-3 feet. Base flood elevation undetermined.

A99
Subject to 100-year flood, with federal flood protection system (levee/dam) under construction. Base flood elevation undetermined.

V
Subject to 100-year flood and additional velocity hazard (wave action). Base flood elevation undetermined.

VE or V1-V30
Both VE and V1-V30 represent areas subject to 100-year flood and additional velocity hazard (wave action). Base flood elevation determined.

In SFHA
Areas in a "Special Flood Hazard Area" (or 100-year flood plain). Subject to 1% annual chance flooding. No distinctions have been made between the different flood hazard zones that may be included within the SFHA.

Flood Prone Area
An area designated as a "Flood Prone Area" on a map prepared by USGS and the Federal Insurance Administration. This area has been delineated based on available information on past floods. This is an area inundated by 1% annual chance flooding for which no base flood elevations have been determined.

Annual Probability of Flooding of 0.2% to 1%

B
B represents areas between the limits of the 100-year and 500-year flood; or certain areas subject to 100-year flood with average depths less than 1 foot or where the contributing drainage area is less than 1 square mile; or areas protected by levees from the 100-year flood.

Annual Probability of Flooding of Less than 0.2%

C
C represents areas outside the 500-year flood plain with less than 0.2% annual probability of flooding.

Annual Probability of Flooding of Less than 1%

No SFHA
Areas outside a "Special Flood Hazard Area" (or 100-year flood plain). Can include areas inundated by 0.2% annual chance flooding; areas inundated by 1% annual chance flooding with average depths of less than 1 foot or with drainage areas less than 1 square mile; areas protected by levees from 1% annual chance flooding; or areas outside the 1% and 0.2% annual chance floodplains.

Undetermined

D
Unstudied areas. Flood hazards are undetermined.
