RSVP: Lauren Flaherty (561) 630-5778

Technology 101

Education is Power!

Many of us struggle with the use of the iPhone or iPad, TV controls, etc. This is an opportunity to take the first step and learn the basics of the iPhone and how to use it.

We will learn what the hardware elements are called (buttons, ports, etc.) what the Apple ID is, how to enable a lock screen with a code, and how to download an App. This will be a very basic, but information foundation-building class.

Take the time to enhance your ability to be connected and feel confident with the tools that really do make life easier.

Praetas is a residential and commercial IT sales and support company located in Palm Beach Gardens, servicing all of Florida. They do everything from building custom PC's, to networking, to TV mounting, server and e-mail management.
